

**REMARKS**

It has come to the Applicant's attention that there is no description of added Fig. 2A which was approved by the Examiner in the Official Action mailed August 13, 2003.

This error has been corrected with the above amendment. As the Examiner has authority to enter amendments submitted after Notice of Allowance of an application which embody merely the correction of trivial matters which do not affect the scope of the claims as allowed, Applicants request this amendment be entered without withdrawing the case from issue. Such amendment is needed for the proper definition of the invention and does not change the basis for the patentability of the claims.

Applicants regret not noticing these errors earlier.

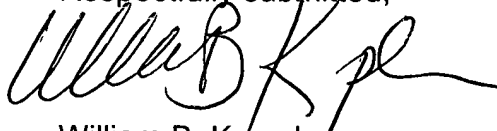

It is submitted that the patent application, including the specification and claims, as amended, taken together with the drawings of record, is now in proper form to proceed to issue.

Should the Examiner have any further comments or suggestions, it is respectfully requested that the Examiner contact the undersigned in order to expeditiously resolve any outstanding issues.

To the extent necessary, Applicant petitions for an Extension of Time under 37 CFR 1.136. Please charge any fees in connection with the filing of this paper, including extension of time fees, to the Deposit Account No. 20-0668 of Texas Instruments Incorporated.
